The Faculty of Medical and Life Sciences of Sunway University envisions to become a leading provider of healthcare and life sciences education with a dedicated pursuit of research and service excellence. The Faculty provides a platform for an engaging and nurturing teaching and learning experience of the highest standards and quality. Furthermore, we have a very established biological, life sciences and psychology programme, that link and engage with many established industries. Additionally, we also collaborate with Harvard University in organising the Harvard's South East Asia Healthcare Leadership (SEAL) programme as well as with the University of Cambridge and University of Oxford on various educational and research initiatives.

Advancements in medicine and healthcare provision are driven by technological innovations and an improved understanding of the health disease continuum. Our academic staff have been trained in various healthcare and life sciences disciplines that allow for the integration of an interdisciplinary approach in our research endeavours. We have also fostered a collaborative network involving various national and international researchers that ensure that our focus is in discovering new knowledge and translating discoveries to modalities and strategies that ultimately, save and improve the quality of lives.
